

## FAQ MDEON

### **FAQ 1. HEALTHCARE PROFESSIONALS CONCERNED**

- FAQ 1.1. Which professions are concerned by the visa procedure?
- FAQ 1.2. Is a visa required when hospitality is offered to a speaker or a consultant?
- FAQ 1.3. Is it necessary to request a visa when a company wishes to invite a healthcare professional from another country?

### **FAQ 2. COMPANIES CONCERNED**

- FAQ 2.1. Which companies are concerned?
- FAQ 2.2. When a healthcare professional practising in Belgium is sponsored by a company from abroad, does he or she need to be covered by a visa number?

### **FAQ 3. THE CONCEPT OF "EVENT OF SEVERAL DAYS"**

- FAQ 3.1. What exactly is covered by the expression "an event taking place during several consecutive calendar days"?
- FAQ 3.2. Is a visa required for an event lasting several days when no participant stays overnight or if the healthcare professional only participates one day?
- FAQ 3.3. What about a scientific meeting that takes place over less than a day organised during but nothing to with a congress?

### **FAQ 4. SCIENTIFIC PROGRAMMES**

- FAQ 4.1. What constitutes a detailed scientific programme?
- FAQ 4.2. Does a preliminary programme suffice in order to establish the scientific nature of an event?
- FAQ 4.3. What should a company do if the detailed programme for an event is only available just before the commencement of the event?
- FAQ 4.4. Important note concerning the programme of investigator meetings
- FAQ 4.5. Are social activities permitted?

### **FAQ 5. TYPES OF SCIENTIFIC EVENTS**

- FAQ 5.1. For which types of events can a visa be accorded?
- FAQ 5.2. Factory visits

### **FAQ 6. SPONSORING OF ORGANISERS**

- FAQ 6.1. Is it necessary to request a visa when a company sponsors the organiser of a scientific event?
- FAQ 6.2. The congress organiser of an event taking place in Belgium possesses a visa number for its sponsors. Do I need another visa number if my company invites healthcare professionals to the same congress?
- FAQ 6.3. Is a visa required when a company sponsors the organiser of an event taking place in another country?
- FAQ 6.4. What constitutes a detailed budget submission?
- FAQ 6.5. Must the budget be balanced?

#### **FAQ 7. ARRIVAL AND DEPARTURE – DAYS AND TIMES**

- FAQ 7.1. If an event is due to commence at 10am Paris time, may the company invite healthcare professionals to arrive the evening before ?
- FAQ 7.2. If a congress finishes at noon on a Saturday and the next direct return flight is on the Sunday morning, may this flight be used or must indirect flights be used on the Saturday afternoon?
- FAQ 7.3. If an event finishes in a country other than Belgium at 5.00pm and the flight to Brussels arrives at 10.30pm may a flight be taken the next day in the morning?

#### **FAQ 8. MIDDAY AND EVENING MEALS AND OVERNIGHT STAYS**

- FAQ 8.1. Is there a cost-ceiling for meals and overnight stays?
- FAQ 8.2. Is it permitted to offer dinner at the end of a meeting? And what about meals offered before the start of a meeting?
- FAQ 8.3. What action should be taken if a healthcare professional has reserved a room independently him/herself at a cost which is greater than that accepted by Mdeon?
- FAQ 8.4. Can a company only sponsor meals during a congress?

#### **FAQ 9. THE REGISTRATION FEES**

- FAQ 9.1. Is a visa required if a healthcare professional requests the company to only sponsor his or her registration fees for a congress which is to take place over more than one day ?
- FAQ 9.2. What action should be taken when the registration fee includes a social activity?
- FAQ 9.3. What action should be taken when the registration fee includes hospitality costs?
- FAQ 9.4. Does a company need to substantiate what is included in the registration fee, even if the company would not sponsor the registration fee?

#### **FAQ 10. TRANSPORT COSTS**

- FAQ 10.1. Is Business Class travel authorised ?
- FAQ 10.2. What action should be taken if a healthcare professional (consultant) wishes to travel in Business Class and the flight is during less than 6 hours?
- FAQ 10.3 What must a company demonstrate when it sponsors a flight ticket?

#### **FAQ 11. THE CONCEPT OF HOSPITALITY**

- FAQ 11.1. What type of hospitality may a company offer a healthcare professional to enable him or her to attend a scientific event?

#### **FAQ 12. EXTENDING OF STAY**

- FAQ 12.1. Is it permissible for a healthcare professional to lengthen his or her stay for private reasons?
- FAQ 12.2. Is a company authorised to finance all transport costs in the event of the lengthening of a stay?
- FAQ 12.3. What percentage of the transport costs may be funded by the company when the lengthening of a stay cannot be seen as being accessory to the event?

#### **FAQ 13. PROCEDURE**

- FAQ 13.1. Requests for visas must be made no later than the 15th working day preceding the commencement of the event; how can this requirement be met?

- FAQ 13.2. In which cases may the period for applications of a visa be reduced to 6 working days?
- FAQ 13.1. Does a company always have to add a justificatif regarding the registration fee and flight ticket?
- FAQ 13.4. What should be done in the case of indirect sponsorship, when the company does not choose which healthcare professionals benefit from the sponsorship?
- FAQ 13.5. I already have a visa number, but something has changed. When do I have to resubmit the application due to a substantial modification?
- FAQ 13.6. Where do you need to pay attention when submitting a visa application V1?

#### **FAQ 14. OVERSEEING OF VISA REQUIREMENTS**

- FAQ 14.1. Who controls whether a sponsorship has received a visa number?
- FAQ 14.2. How can one verify whether or not a sponsorship is or is not covered by a visa number?
- FAQ 14.3. Which main sanctions would be applied in the case of a visa requirement not being adhered to?
- FAQ 14.4. Why is it important to communicate the visa number?

#### **FAQ 15. TECHNICAL TIPS**

## **FAQ 1. HEALTHCARE PROFESSIONALS CONCERNED**

### **FAQ 1.1. Which professions are concerned by the visa procedure?**

Doctors, pharmacists, nurses, vets, dentists, truss-makers, opticians, hospital directors, hospital equipment purchasers, chiropractors, midwives, laboratory directors, bio-medical operatives, wholesalers, physiotherapists, nutritionists, hospital technicians, clinical psychologists, etc.

I.e: anyone in the healthcare sector who:

- distributes, purchases (or prepares for purchase), prescribes, recommends, delivers or administers medicinal products and/or
- distributes, purchases (or prepares for purchase), rents-out (or prepares for renting), recommends, uses or prescribes medical devices,

including institutions in which one or more of these activities take place.

### **FAQ 1.2. Is a visa required when hospitality is offered to a speaker or a consultant?**

Yes, if it concerns a healthcare professional (see FAQ 1.1).

### **FAQ 1.3. Is it necessary to request a visa when a company wishes to invite a healthcare professional from another country?**

In principle, it is not necessary to request a visa under these circumstances, unless the professional concerned exercises in his capacity as such in Belgium.

## **FAQ 2. COMPANIES CONCERNED**

### **FAQ 2.1. Which companies are concerned?**

Companies which in Belgium

- manufacture, import, deliver and/or distribute medicinal products and/or
- have a marketing authorisation for a medicinal product and/or
- have a CE marking for a medical device and/or
- manufacture, import, deliver, distribute and/or rent-out medical devices,
- and invite or sponsor one or more healthcare professionals who practise in their capacity in Belgium to participate in an event of a scientific nature.

In other words, are concerned:

- both pharmaceutical companies and companies of the medical devices sector
- both Belgian companies and those from other countries
- both manufacturers and distributors, wholesalers or importers.

**FAQ 2.2. When a healthcare professional practising in Belgium is sponsored by a company from abroad, does he or she need to be covered by a visa number?**

A visa is required once a healthcare professional practicing in Belgium is invited or sponsored by a pharmaceutical company or a company from the medical devices sector, whether or not they are based in Belgium.

**FAQ 3. THE CONCEPT OF "EVENT OF SEVERAL DAYS"**

**FAQ 3.1. What exactly is covered by the expression "an event taking place during several consecutive calendar days"?**

This is the legal wording coming from article 10 of the Law on medicinal products.

Two situations are concerned:

- The scientific programme of the event takes place over several consecutive calendar days. *Ex.:* it commences on day A and finishes on day B
- The scientific programme of the event takes place on one single day (or less) but requires an overnight stay as the event takes place abroad. *Ex.:* an event commences in Paris at 8.00am and finishes at 4.00pm. Participants must arrive the night before in order to be punctual for the start of the event. The event as a whole therefore takes place over several consecutive calendar days, even though the programme lasts for less than one day.

**FAQ 3.2. Is a visa required for an event lasting several days when no participant stays overnight or if the healthcare professional only participates one day?**

Yes, a visa is required as the programme alone already takes place over more than one consecutive calendar day.

**FAQ 3.3. What about a scientific meeting that takes place over less than a day organised during but nothing to with a congress?**

If a company organises a scientific meeting lasting less than a day where only a dinner and/or a lunch is being offered and that is taking place abroad because of a congress at the same time to which all the invited healthcare professionals are participating, then no visa is required if:

- it lasts less than a day,
- it has nothing to do with the congress taking place at the same venue and its agenda and invitation were set and sent out in advance (this is prior to the congress taking place at the same time),
- it concerns an international public,
- only a meal is being offered.

Please note: in that case, [Circular No. 622 of December 1, 2015](#) of the Federal Agency for Medicines and Health Products has to be respected. This circular states the following: "In total, a maximum of 20 euros Hospitality per person per full hour scientific event is allowed with a maximum of 40 euros per lunch and 80 euros per dinner (all inclusive: including meals, drinks, taxes, room rental, etc.)."

If, on the other hand, it concerns the sponsoring of only meals during a congress, see FAQ 8.4.

## FAQ 4. SCIENTIFIC PROGRAMMES

### FAQ 4.1. What constitutes a detailed scientific programme?

A scientific programme is considered to be detailed when it contains per day:

- a detailed timetable (not only from 9.00am to 12 noon and from 1.00pm to 5.00pm but per units of 20 or 30 minutes, for example), also mentioning the date of the meeting.
- and a detailed content (not only the nature of the sessions but also the title of each scientific topic and, if possible, the names of the speakers). The content must sufficiently clear so that the Visa Bureau understands what it is about. If there is too much jargon or uncommon abbreviations, this should be clarified to enable the Visa Bureau to properly exercise its control powers.

Please note that only programs of a *purely scientific* nature in the context of the medical and pharmaceutical science are allowed (see FAQ 5.1).

### FAQ 4.2. Does a preliminary programme suffice in order to establish the scientific nature of an event?

A preliminary programme may suffice with the proviso that it is detailed for each day in terms of content and timetable.

### FAQ 4.3. What should a company do if the detailed programme for an event is only available just before the commencement of the event?

The company may submit a request for a visa so long as the following are included at the time of the submission:

- the *provisional* programme as it stands at the moment of submission of the visa
- the *detailed* programme of the previous edition
- and a confirmation by the organiser (by email) or by the company of the date at which the detailed programme will be available. This date must be no later than three months before the event; company will otherwise have to await the publication of the detailed programme before applying for a visa.

After having obtained a visa on this basis, it is incumbent on the company to verify that the detailed programme, once available, does not differ in any way from the previous application. If this were not to be the case, a new request for a visa would have to be submitted as a result of the substantial modification to the programme.

However, the above-mentioned does not apply:

- to events taking place for the first time
- to events organised by a company
- to visa requests concerning sponsorship of scientific organisers (V2).

In these cases the request for a visa should only be made once the detailed programme (provisional or definitive) is ready.

#### **FAQ 4.4. Important note concerning the programme of investigator meetings**

As far as meetings for investigators are concerned, it is important to briefly explain in the visa submission (or in an appendix) what the clinical trials consists of and its aims. If uncommon abbreviations are used in the résumé of the programme, they must be explained. Some meetings for investigators are in fact so full of abbreviations that the Visa Bureau is not in a position to verify if the event is a purely scientific one.

#### **FAQ 4.5. Are social activities permitted?**

If the scientific event is to be organised by a company (or by a third party on behalf of a company), no social or cultural activity may be organised – even if healthcare professionals participating are to pay for any such activity.

If the event is to be organised by healthcare professionals or other associations independent of companies, it is allowed to organise a social or cultural event, but only on condition that

- it is not part of the scientific program (e.g. not during the day, but in the evening once the scientific sessions ended), and
- it is financed from other funds than those issuing from medical devices or pharmaceutical companies.

### **FAQ 5. TYPES OF SCIENTIFIC EVENTS**

#### **FAQ 5.1. For which types of events can a visa be accorded?**

For all types of events of a purely scientific nature: international congresses, meetings of investigators, expert meetings, life surgery meetings, local symposiums, hospital staff meetings, practical courses, etc.

Certain topics, presentations or workshops can perhaps be interesting for the participating professionals, but are not in the context of the medical or pharmaceutical science. See for example presentations and workshops on financial, tax or social aspects linked to the exercise of a practice or "train the trainer" sessions. If such activities are planned, then also purely scientific activities need to be scheduled occupying the greater part of each day of the event.

In order to present an exclusively scientific nature, the activities of a scientific nature must always occupy the greater part of each day of the event, from the arrival until the moment of departure. One day must include at least six hours of scientific activities (excluding breaks), during normal office hours (and therefore not for example 7 am - 1 pm). For the first day and the last day, three hours may be sufficient to allow arrivals and departures.

#### **FAQ 5.2. Factory visits**

Factory visits are not allowed, except in the following cases:

- Product or procedure training of medical devices that can only take place in the factory because of the relevant expertise or infrastructure in place;
- In the event of a major scientific added value for the participating professionals, which must be substantiated and justified. The motivation must prove, among other things, why the scientific event cannot take place in Belgium. Moreover, if the factory visit is to be preceded by presentations on theoretical aspects, the latter must represent a maximum of a third of

the programme, if not the transfer abroad is not justified for the entire duration of the meeting.

## **FAQ 6. SPONSORING OF ORGANISERS**

### **FAQ 6.1. Is it necessary to request a visa when a company sponsors the organiser of a scientific event?**

Yes. Form « V2 – Sponsorship of the Organiser of a Scientific Event » must be completed.

### **FAQ 6.2. The congress organiser of an event taking place in Belgium possesses a visa number for its sponsors. Do I need another visa number if my company invites healthcare professionals to the same congress?**

Yes, as this is another form of sponsorship (that of participants and not of an organiser) which must be the object of a specific visa request via form « V1 – Sponsoring of Participants to a Scientific Event »

### **FAQ 6.3. Is a visa required when a company sponsors the organiser of an event taking place in another country?**

Yes, if the event is organised by an association (or on behalf of an association) managed by a majority of healthcare professionals practising in Belgium.

### **FAQ 6.4. What constitutes a detailed budget submission?**

A budget must consist of at least two columns: credit and debit. The credit column includes registration fees for the event (estimate), industrial financial sponsorship amounts, any subsidies, any pre-existing funding, etc. The debit column lists expenses linked to the event in detail. For a full example of what is required click [here](#).

If the only source of income is coming from companies and the entire amount will be used by the organisers to cover all costs, the cost of the offered hospitality (lunch, dinner, lodging, etc.) must respect the maximum amounts mentioned in FAQ 8.1 and no social or cultural activity can be foreseen.

### **FAQ 6.5. Must the budget be balanced?**

The budget does not necessarily have to balance. The organiser declares in any case in the visa submission that any eventual financial profit will be used according to article 10 of the law of 25 March 1964 on medicinal products. In addition, by submitting the visa application, the organiser commits himself to send the amount and allocation of the result of the closed accounts by email to the Mdeon Secretariat within three months following the end of the scientific meeting.

## **FAQ 7. ARRIVAL AND DEPARTURE – DAYS AND TIMES**

### **FAQ 7.1. If an event is due to commence at 10am Paris time, may the company invite healthcare professionals to arrive the evening before ?**

Approval would be given in such a case but healthcare professionals must then finance the additional dinner and overnight stay themselves as it would be possible to arrive in Paris on the same morning (leaving Brussels via Thalys, for example at 7.30am or 8.15am) and arrive in time for the start of the event (unless a particular reason for not so doing was declared in the visa submission). The same reasoning would apply for other destinations, such as Amsterdam, London, etc.

**FAQ 7.2. If a congress finishes at noon on a Saturday and the next direct return flight is on the Sunday morning, may this flight be used or must indirect flights be used on the Saturday afternoon?**

Arrival and leaving dates must coincide as closely as possible with the opening and closing times of the scientific event. Choosing a direct flight which would mean that the healthcare professional would come back later than if he or she had taken an indirect flight is, therefore, not acceptable unless the indirect flight does not present a reasonable alternative (for example where the indirect flight would arrive at destination in the middle of the night).

**FAQ 7.3. If an event finishes in a country other than Belgium at 5.00pm and the flight to Brussels arrives at 10.30pm may a flight be taken the next day in the morning?**

This would be acceptable but the healthcare professional would then have to finance the additional cost of the overnight stay and the evening meal him/herself -save for reasonable justification and motivation- as it would have been reasonably possible to return home before midnight.

**FAQ 8. MIDDAY AND EVENING MEALS AND OVERNIGHT STAYS**

**FAQ 8.1. Is there a cost-ceiling for meals and overnight stays?**

Yes, a maximum of 40 EUR for lunch (drinks included), 80 EUR for dinner (drinks included), 250 EUR for an overnight stay (breakfast and local taxes included) and 20 EUR for breaks.

**FAQ 8.2. Is it permitted to offer dinner at the end of a meeting? And what about meals offered before the start of a meeting?**

According to article 5.2 of the Code of ethics of Mdeon, the hospitality offered must strictly be limited to the official duration of the scientific event. This means that a meal can only be offered during scientific activities, if it immediately precedes the start of scientific activities or immediately follows the end of scientific activities.

Examples:

- It is permitted to offer a meal after a meeting abroad if it is impossible to return to Belgium that day and if the dinner coincides with the end of the scientific program (if the program ends before 5.30 PM, dinner cannot be offered).
- It is permitted to offer a lunch before the start of the scientific event, only if the scientific event starts before 2.30PM (if the program starts after 2.30 PM, lunch cannot be offered).
- If a scientific program begins on Monday at 10 AM but the invited healthcare professionals need to arrive the night before because it is impossible to arrive on the morning of the beginning of the scientific activities, then an overnight stay may be offered on Sunday evening but not a dinner since it does not directly precede the beginning of scientific activities. It would however be otherwise if the scientific activities started at 8.30 am on Monday.

**FAQ 8.3. What action should be taken if a healthcare professional has reserved a room independently him/herself at a cost which is greater than that accepted by Mdeon?**

The healthcare professional must take on board him/herself any cost in addition to the 250 EUR laid-down by Mdeon. This must be clearly stated in the visa application (e.g. in section B.8).

**FAQ 8.4. Can a company only sponsor meals during a congress?**

No, because the sponsoring must primarily be used for the sponsoring of a scientific event, which is not the case only if meals are offered. At least also something else that is necessary in order to take part in the scientific event must be sponsored (overnight stay, transportation, registration); if then additional meals are served, this remains accessory to the main objective.

However there is one exception: a lunch or dinner during a satellite symposium organised by the company and referred to on the official scientific program of the conference organiser.

If, on the other hand, it concerns meals offered during a scientific meeting that takes place over less than a day and that is organised on the occasion of but has nothing to do with a congress, see FAQ 3.3.

**FAQ 9. THE REGISTRATION FEES**

**FAQ 9.1. Is a visa required if a healthcare professional requests the company to only sponsor his or her registration fees for a congress which is to take place over more than one day ?**

Yes.

**FAQ 9.2. What action should be taken when the registration fee includes a social activity?**

Only activities of a scientific nature may be sponsored. Consequently, if registration fees of a scientific event organised by healthcare professionals include a social activity (meals are not considered to be as such, contrary to a sightseeing tour or attendance at a show, etc.), there are two options:

- the company does not sponsor the registration fee,
- the company does sponsor the registration fee, minus the cost of these activities are . Item B.4 of the visa application form allows this. If the organiser of the event has not stated the cost of the social activity, a reasonable estimate of the cost must be made.

**FAQ 9.3. What action should be taken when the registration fee includes hospitality costs?**

When an event is organised by a company, hospitality costs must be indicated separately in the ad hoc section of item B.4 on the visa application form (lunch, dinner, transport and overnight stays). The outstanding balance of the registration fee should appear in the section 'registration' ('inscription'). In other words, the company must not simply state an 'all-inclusive' global sum per participant.

When an event is organised by a third party and the registration fee also includes hospitality, attention must be made to avoid any doubling-up. i.e. : the offering of the cost of a meal when this

already appears in the registration fee (e.g. lunch symposium), which is not admissible even though the company would not sponsor the registration fee.

**FAQ 9.4. Does a company need to substantiate what is included in the registration fee, even if the company would not sponsor the registration fee?**

Yes, this is mandatory when the participation to a scientific event organised by healthcare professionals is sponsored, regardless of whether or not the registration is offered and regardless of whether or not there is a registration fee. Indeed, the visa application form asks to attach this justificatif even if the registration is not sponsored.

A justificatif must be added of what is included in the registration fee (lunch, dinner, social activity, etc.) and of its amount. If there is no registration fee, a justificatif of what the organiser offers as hospitality must be added.

The document to be attached has to be:

- either a print screen from the conference website (no email nor invoice of the organiser), that clearly mentions what is included in the registration fee (careful: make sure that the print screen is large enough to show the source of it)
- or, in the absence of information on the conference website, the congress organiser must complete the following model of sworn statement: [model of sworn statement - registration](#). After completing the statement, the organiser must affix a handwritten signature and his stamp (in case of absence of a stamp, it must be printed on the stationery of the organisation), then convert the document to PDF and send it to the company to be attached to the visa application.

Example of what is included in the registration's fee:

*Registration fee includes:*

- *Access to the scientific sessions*
- *Congress material*
- *Lunches on day xyz*
- *Diner on day xyz*
- *Social activity (cost/pp is ... EUR)*
- *Welcome reception*
- *Etc.*

Please note that if it concerns a scientific event organised by a pharmaceutical or medical device company (even if it is not the submitting company itself), no justificatif should be added. Although, in that case, every offered hospitality must be detailed (€) in section B4 of the visa application (e.g. price of the offered lunch, dinner, overnight stay).

**FAQ 10. TRANSPORT COSTS**

**FAQ 10.1. Is Business Class travel authorised ?**

Train travel must be in either economy class or business class.

Travel by plane happens basically in standard economy class. Travelling by plane in business class is only authorized if (cumulative conditions):

- the invited/sponsored healthcare professional participates in the scientific event as a consultant
- and the outward and / or return flight is longer than a) six consecutive hours, b) or six non-consecutive hours because of a stopover, however, excluding the waiting time at the stopover airport (in other words, the consultant is at least 6 hours in the air).

Thus, regarding transport, a difference in terms of financing is made between participating healthcare professionals and those with the status of consultant. Here follows a definition of these categories:

- Participants: healthcare professionals taking part in a scientific event in a learning situation
- Consultants: healthcare professionals who are providing scientific services within the context of a scientific event on behalf of the organiser of the event or on behalf of a pharmaceutical or medical devices company. Examples: speakers, investigators, expert meeting, etc. The status of the consultant must be demonstrated in the dossier (e.g. name in program, defining mission in visa application).

See below for a summary:

Form of Transport	Healthcare Professionals as <u>Participant</u>	Healthcare professionals as <u>Consultant</u>
<b>Train</b>	Economy Class or Business Class	
<b>Plane</b>	Economy Class*, for whatever the destination and duration of flight	Economy Class*. For flights longer than 6 hours, Business Class is Authorized.  First class is not allowed.
	Non-flexible tickets, save for (cumulative conditions): <ul style="list-style-type: none"> <li>- justified motivations (e.g. luggage, cancel option, to leave earlier in case the congress ends sooner than expected, etc.),</li> <li>- statement in the visa application that the flex character will not be used to prolong the stay (leave earlier or come back later).</li> </ul>	
	The Healthcare Professional may travel in Business or First Class if he or she pays the difference in cost of an (standard) Economy Class ticket. This must be clearly stated in the visa application (e.g. in section B.8) and supported by documents.	
<b>Use of personal vehicle</b>	Maximum rate of 0,35 € per kilometer (toll included).  For long distances by car (> 500 km), sponsorship is limited to the cost of an airline ticket in economy class if this is a reasonable and cheaper alternative.	
<b>Transport to/from airport/railway station within Belgium</b>	Transport by train	
	Taxi or fuel costs from home to the airport/railway station for departure abroad are to be paid by the Healthcare Professional	Reasonable transfer costs may be funded (e.g. taxi, fuel costs)

<b>Transfer costs whilst abroad</b>	Reasonable transfer costs abroad may be refundable. If several healthcare professionals are travelling together, taxis should be shared or a larger transport must be used (e.g. minibus or shuttle). This must be clearly motivated in the visa application (e.g. in section B.8).	
<b>Parking costs</b>	Parking costs at the scientific event or at the airport or railway station are borne by the Healthcare Professional	Reasonable parking costs may be funded.

\* It must always be a "standard" economic class that does not include any additional personal benefits (e.g. more leg room, a glass of champagne, separate cabin, better meal).

**FAQ 10.2. What action should be taken if a healthcare professional (consultant) wishes to travel in Business Class and the flight is during less than 6 hours?**

The healthcare professional must finance him or herself the difference in price with a (standard) Economy Class flight. This must be clearly stated in the visa application (e.g. in section B.8) and supported by documents.

**FAQ 10.3 What must a company demonstrate when it sponsors a flight ticket?**

If a flight ticket is sponsored, there has to be a justificatif of 1) the cost, 2) the class and 3) the date and hours of the chosen flight attached to the visa application. It has to be :

- either a print screen from the reservation made online. On this document must clearly appear both the *cost* of the plane ticket and the *class* (e.g. not just class "E" or "Y") (and if possible the flexible nature of the ticket or not). These information cannot be proven through an email of invoice of a travel agency. We do not expect of course a copy of a definitive reservation since the tickets are booked after reception of the Mdeon visa.
- or a sworn statement completed by the travel agency the company works with, using the following model: [model of sworn statement - flight](#). After completing the statement, the travel agency must affix a handwritten signature and its stamp (in case of absence of a stamp, it must be printed on the stationery of the agency), then convert the document to PDF and send it to the company by email to be attached to the visa application. Note that this sworn statement only applies to plane tickets booked through a travel agency. If a ticket is booked by the company itself, a print screen must be used.

Be careful:

- The cost of the flight mentioned in the visa application (section B.4) *must be exactly the same* as stated on the justificatif and if appropriate, converted into euros,
- A sponsored flight should always leave from Belgium and return to Belgium. An exception may be allowed if the healthcare professional is elsewhere or should be elsewhere for professional reasons (e.g. participation in another conference), which must be justified and documented in the visa application. However, if it is for personal reasons, the flight can only be funded if this ticket is as a result not more expensive (unless the sponsored healthcare practitioner pays the difference in price himself).
- When working with a print screen, all the above mentioned data must figure clearly in one document. This document cannot be combined with another document.

## FAQ 11. THE CONCEPT OF HOSPITALITY

### FAQ 11.1. What type of hospitality may a company offer a healthcare professional to enable him or her to attend a scientific event?

The following may be financed: transport, meals and/or lodging that are strictly limited to the official duration of the meeting and also the cost of local transfers between the airport or railway station and the hotel/restaurant, if reasonable and motivated (e.g. taxi, distance, shared taxi, etc.).

The following may not be financed and must be paid by the invited/sponsored healthcare professionals: drinks at the hotel bar, parking fees (exception for consultants), any passport or visa costs for entering a foreign country (unless limited to the period of the scientific event), use of a taxi or costs linked to use of a personal vehicle between home and airport or railway station for departure abroad (exception for consultants), snacks/lunch/diner or refreshments at the airport or during the journey (with car or train), etc. Such costs are considered as being of a personal nature.

In all cases, hospitality costs must be reasonable and remain accessory to the scientific nature of the event.

## FAQ 12. EXTENDING OF STAY

### FAQ 12.1. Is it permissible for a healthcare professional to lengthen his or her stay for private reasons?

A healthcare professional may obviously extend his or her stay for personal reasons but all additional costs linked to this prolongation are at the charge of the individual.

### FAQ 12.2. Is a company authorised to finance all transport costs in the event of the lengthening of a stay?

Yes, with the proviso 1) that transport costs are not higher than they would have been if the healthcare professional had not extended his or her stay (if this is the case, then the healthcare professional must pay the difference in price himself) and 2) on the understanding that the duration of the extended stay remains accessory in relation to the duration of the scientific event.

The following table indicates when an extension of a stay is considered as to be accessory:

Length of the event (in days)	The extension* is accessory if the duration is a maximum of (in days)
1	1
1,5	1
2	1,5
2,5	2
3	2
3,5	2,5
4	3
4,5	3,5

\* By 'extension' it is understood all the days without scientific activity.

**FAQ 12.3. What percentage of the transport costs may be funded by the company when the lengthening of a stay cannot be seen as being accessory to the event?**

The company must limit its contribution as being towards transport costs linked directly to the scientific event. In concrete terms, the part paid by the company is limited to the fraction of the total cost obtained through multiplying the total travel costs by a fraction of which the numerator corresponds to the official duration of the scientific event in (half)days, and the denominator corresponds to the total duration of the stay, also counted in (half)days.

For example: a doctor participates in a scientific event in Rome for three days and then extends his stay by three days in order to visit the city – a total of 6 days. The company may only fund 3/6ths or half of this healthcare professional's travel expenses, the other half being at the doctor's expense.

**FAQ 13. PROCEDURE**

**FAQ 13.1. Requests for visas must be made no later than the 15th working day preceding the commencement of the event; how can this requirement be met?**

The easiest way is to count backwards; e.g.: the scientific activities commence on Monday 2 May. If 15 working days are counted backwards from the first working day preceding, i.e.: from Friday 29th April and then not counting Monday 25th April (Easter Monday Bank holiday) the 15th working day preceding the event will be Friday 8th April. The request may be submitted on that day included, up to midnight (Belgian time).

One has to count backwards from the first day of scientific activities, even if the participants do not participate on that day. See also the tool "Calculation of the 15th working day" available on the Mdeon homepage, on the right in the gray frame.

**FAQ 13.2. In which cases may the period for applications of a visa be reduced to 6 working days?**

In the four following situations:

- When the event gathers together a maximum of 15 participants and speakers of any different nationalities IN THE SAME PLACE. It should be noted that this figure represents the TOTAL number of persons concerned by the event (participants, speakers, company representatives – Belgian and foreign, all sessions included, etc..) The reason why the delay of 15 working days is not applicable in this case is because the event concerns a maximum of only 15 persons. In fact, the date of the event can be determined much more quickly than when an event concerns a larger number of participants.
- When the request for a visa is re-applied for following a substantial modification to the latter (after an initial granting of a visa).

- When a request for a visa is re-submitted following an initial refusal. It should be noted that this is only valid when the dossier was submitted within the time laid-down. It goes without saying that if the dossier was not submitted within the required time scale of a minimum of 15 working days, the applicant cannot use the reduced time delay of 6 working days.
- When the visa application concerns a healthcare professional taking part in the scientific meeting as a consultant, which must be demonstrated.

**FAQ 13.1. Does a company always have to add a justificatif regarding the registration fee and flight ticket?**

Travel expenses: if a flight is sponsored (outward and / or return), the justificatif as referred to in FAQ 10.3 must always be attached.

Registration fee: once a company sponsors the participation to a scientific event organised by health professionals, the justificatif as referred to in FAQ 9.4 must always be attached, irrespective of whether or not the registration fee is sponsored and irrespective of whether or not a registration fee is requested.

**FAQ 13.4. What should be done in the case of indirect sponsorship, when the company does not choose which healthcare professionals benefit from the sponsorship?**

If a company sponsors the participation of healthcare professionals in scientific events not directly, but through healthcare organisations (hospitals, scientific associations), it concerns an indirect sponsorship of scientific events. In this case, it will be the healthcare organisations that determines which professionals will benefit from the sponsorship. If it concerns a sponsorship of participation to an event that takes place over several consecutive calendar days (including hospitality) (see FAQ 3), this indirect sponsorship is subject to a visa requirement and a visa application must be submitted *jointly* by the healthcare organisation *and* the company: the healthcare organisation completes the visa application, encloses the necessary annexes and sends it to the company, who checks it, pays it and introduces it. For more information, see the [operating instructions](#) and the [brochure](#) in this regard.

**FAQ 13.5. I already have a visa number, but something has changed. When do I have to resubmit the application due to a substantial modification?**

If you have received a visa number, you have to submit a new visa application if your project of sponsorship undergoes a *substantial modification* between the moment of submitting the visa application and the beginning of the scientific event (art. 22.1 of the Code of Ethics).

In this case a new visa application may be submitted **at the latest the 6th working day prior** to the day the event starts (art. 17.4 of the Code of Ethics).

In general is considered as *substantial* every modification of which we can reasonably presume that the Visa office should take it into consideration in order to take a decision with full knowledge of the case.

Here are a few examples a substantial modifications, not limitative:

V1 – Sponsorship of participants

- the transport cost increases by 50% or more or the transport class changes
- the number of sponsored participants

- increases by 3 or more persons (when you have already obtained a visa number for at least 4 persons) and the offered sponsorship remains the same
- at least doubles (when you've already obtained a visa number for 1 to 3 persons) and the offered sponsorship remains the same
- increases (independent of the number) and the offered sponsorship *is different* for the additional participant(s)
- the sponsorship is extended to costs other than those mentioned in the original visa application (addition of transport costs, costs for overnights,...)
- the hours of arrival or departure alter in an important way (see case by case) if the company sponsors the transport costs, even when the change in hours has no impact on the transport cost
- the scientific program alters
- the company sponsors one or more overnights extra
- the location of the scientific event alters
- the dates of the scientific event alter and this altering has an impact on the sponsoring
- in case of a grouped visa application concerning several identical events, an increase of the amount of times the event will take place

#### V2 – Sponsorship of the organiser

- substantial modification of the budget:
  - additional sponsor(s)\*
  - extra costs in the budget (e.g. addition of a social activity)
  - etc.
- alteration of the scientific program
- alteration of the location of the event
- the dates of the scientific event alter and this altering has an impact on the sponsoring.

\* (!) The grouped visa number obtained by the organiser **covers only the companies mentioned in the visa application** and afterwards in the decision. If one or more sponsors present themselves later their sponsorship will have to be subject to a new visa application (substantial modification). This application can be submitted by the organiser as well as by the company itself. In this last situation, the file number of the organiser has to be mentioned in the visa application in order to allow the Visa Office to link the different applications.

#### **FAQ 13.6. Where do you need to pay attention when submitting a visa application V1?**

Mdeon has drawn up a checklist that can help you complete a V1 visa application. This checklist provides section by section of the visa application V1 "tips & tricks" to ensure that you do not forget anything. In addition, the corresponding FAQ number is always mentioned, so that in case of doubt you know where you can go for more information.

Click [here](#) for the checklist.

#### **FAQ 14. OVERSEEING OF VISA REQUIREMENTS**

##### **FAQ 14.1. Who controls whether a sponsorship has received a visa number?**

L'Agence Fédérale des Médicaments et des Produits de Santé (A.F.M.P.S.) (The Federal Agency for Medicines and Health Products – F.A.M.H.P.). Mdeon is limited to ensuring an a priori oversight.

##### **FAQ 14.2. How can one verify whether or not a sponsorship is or is not covered by a visa number?**

In this case contact should be made with the « Contact-Point » put in place by the authorities (02/524.83.58).

**FAQ 14.3. Which main sanctions would be applied in the case of a visa requirement not being adhered to?**

Both the sponsoring company and the healthcare professional receiving the sponsorship will be liable to legal proceedings (punishable by a prison sentence of between 1 month and 1 year and/or a fine of between 1.600 and 120.000 EUR).

**FAQ 14.4. Why is it important to communicate the visa number?**

In order that the two parties concerned (company and healthcare professional) can be sure that the applicable legal and code of ethic provisions have actually been respected (in view of the existence of penal sanctions which exist in case of non-respect of these provisions).

It is therefore essential that the visa number should appear:

- in correspondence exchanged between organisers and companies in the case of sponsorship of the organiser of an event
- in the correspondence exchanged between companies and healthcare professionals in the case of direct sponsorship of participants.

**FAQ 15. TECHNICAL TIPS**

- Request your information technology expert to ensure that the e-mail addresses [info@mdeon.be](mailto:info@mdeon.be), [visa@mdeon.be](mailto:visa@mdeon.be), and [visum@mdeon.be](mailto:visum@mdeon.be) are to be accepted and not placed in the spam bin.
- The keys Ctrl+F5 allow the programme to be refreshed
- Never use the key '&' in the title of an appendix in an attachment to a visa request (nor in the 'route' leading to the document in your index).
- Certain headings appearing on the visa application form must be completed or the form cannot be sent. If one of these headings is not applicable in your case, the letters NA (not applicable) should be used in order that the form can be sent.
- Appendices attached to a visa request must not be greater than 4MB per annexe. If a scientific programme is any heavier, please send it in two parts in distinctly separate pdf documents.
- If you receive a message saying "this site is not secure" it will be because your navigator does not possess a *Network Solution* certificate as used by Mdeon. In order to remedy the problem, you will need to accept our certificate via the link [Network Solutions Add Trust External CA Root](#). Click on « open » then on « Install the certificate ».
